Introduction to CDP
CARBON DISCLOSURE PROJECT

What is CDP?

- An independent **not-for-profit** organization which holds the largest **database** of corporate climate change information in the world
- CDP provides a global intersection between **Investors** and **Corporations**
- CDP issues annual climate change information requests issued on behalf of **534 institutional investors**, more than **40 purchasing organizations** and **UK government bodies** to more than **3,700 corporations** across the globe
- On their behalf, CDP seeks information on the business **risks** and **opportunities** presented by climate change and GHG emissions data from the world's largest corporations
- CDP programs include: CDP **Investor**, CDP **Supply Chain**, CDP **Public Procurement**, CDP **Cities**

| Emissions Accounting – methodology, Scope 1, 2, 3, contractual Scope2, intensity, verification | Governance – accountability, incentives, and communications |
| Communications – other external publications | |

Changes to CDP 2010

CARBON DISCLOSURE PROJECT

New Questions in the 2010 request

Overall the questionnaire is shorter than in 2009 with a number of sub-questions having been removed. Significant changes from CDP 2009:

- **Risk identification process** - Describe your company's process for identifying significant risks and/or opportunities from climate change and the process for assessing the degree to which they could affect your business, including the financial implications.
- **Link between climate change and strategy** - Please describe how your overall group business strategy links with actions taken on risks and opportunities identified, targets and reporting.
- **More granularity** – Data accuracy and assurance questions broken down by emissions scope.
- **A new specific sector supplement for Oil and Gas companies.**

Thank you for your interest
